Where healthier
meets easier

Reimagining local health care to help increase
engagement, improve health outcomes and lower costs

Chronic disease is driving up costs and can be difficult to manage.

of health care
spending is on chronic
disease care.¹

of adults in
the U.S. have a
chronic disease.²

adults lack the
knowledge to manage
their care.³

is how long the average
American spends with their
doctor four times each year.⁴

Now there's a better path to health

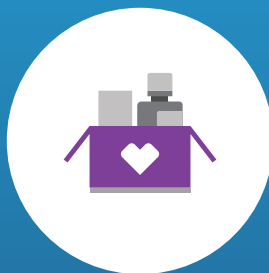

As we navigate the uncertainty around the COVID-19 pandemic, it's a priority that your clients' employees have a place to help get the care they need. CVS® HealthHUB® is helping to make it easier for your clients' employees to proactively take care of their health by connecting them to health services, one-on-one guidance and total health resources — with a focus on chronic conditions. The result is increased engagement, better outcomes and lower, more predictable costs — influencing their long-term trajectory of health care spending.

CVS HealthHUB locations offer:

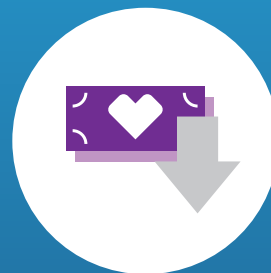

A professional care team

Provides affordable health services and complements the care provided by your clients' employees' doctors, helping them stay on track between appointments.

A range of services, including chronic care

Offers routine health screenings, chronic care tests and services, lifestyle coaching and access to wellness programming.

Lower costs

Helps to drive lower, more predictable costs through increased engagement, less time away from work and better outcomes for your clients' employees.

Integrated data for personalized outreach

Uses data to help proactively identify and engage your clients' at-risk employees through personalized outreach — helping them adhere to their care plans.

Convenience and accessibility

Offers convenient locations in the communities where your clients' employees live and work, with flexible hours — including nights and weekends.

Complementary and connected care

Helps keep your clients' employees' doctors in the loop to close gaps in care via electronic medical records (EMR) integration.
