

Unlock the power of *connected care*

Diabetes is one of your company's biggest health care cost drivers. Connecting your employees' medical plans with their dental, vision and disability plans can help control costs and improve their quality of life.

The impact of diabetes

A diabetes diagnosis dramatically changes the quality of life for your employees and their families. And there's also the financial burden for families and for society at large:

>30 MILLION
Americans are living with diabetes¹

\$237 BILLION
a year in diabetes-related medical costs¹

84 MILLION
have prediabetes, a serious health condition that can increase their risk of chronic diseases¹

Improving health through *better connections*

Anthem Whole Health Connection[®] is about whole-person health. It makes connections between the medical plan and dental, vision and disability plans, so doctors and care managers have a more complete view of each employee's health. This means:

- Doctors can catch and treat problems earlier and close gaps in care.
- Employees are more engaged with their care providers.
- Care is better because everyone is on the same page.

The result? Better health outcomes, lower costs and a better care experience.

At no additional cost to employers, Anthem Whole Health Connection drives cost savings. The more benefits that are integrated, the more complete the view and the savings will be.

The dental and diabetes connection

47% of American adults suffer from periodontal (gum) disease²

Diabetes is better managed with good oral health³

The Anthem Whole Health Connection

We give our members with diabetes extra dental support by automatically enrolling them in extra services like cleanings and exams⁴

Patients with diabetes who treat their gum disease have:

39% FEWER hospital admissions³

40% LOWER medical costs³

The vision and diabetes connection

\$48 BILLION LOST in productivity each year due to vision issues⁵

20% HIGHER medical costs for patients with diabetes who don't use their comprehensive vision benefit⁶

DIABETIC RETINOPATHY is the leading cause of blindness among working-age Americans⁶

The Anthem Whole Health Connection

During a routine eye exam, an eye doctor may be the first to detect diabetes. When vision and medical plans are connected, vision claims that identify diabetes may trigger a referral to Anthem Care Management. This early intervention helps your employees get the care they need sooner – often resulting in better outcomes.

32,000 DIABETICS identified each year by Anthem vision⁷

The disability and diabetes connection

\$90 BILLION a year in lost productivity for employees with diabetes⁸

Employees with diabetes are nearly **2.5X MORE LIKELY** to report work limitations than those who don't have diabetes⁹

The Anthem Whole Health Connection

Our disability case managers and nurse care managers work together to create stay-at-work or return-to-work programs to fit each employee's unique needs. Disability claims for employees with diabetes may trigger a referral to Anthem Care Management for more support.

25% LOWER medical costs when members with disability claims engage with a nurse care manager¹⁰
That's **\$8,000 in savings**

The connections make a difference

Care alerts and clinical communications to members, doctors and care managers make a big impact, closing gaps in care and helping employees return to work sooner:

24,000 dental care gaps closed monthly⁷

145,000 vision care gaps closed monthly⁷

23% OF WORKERS return to work early¹⁰

Anthem Whole Health Connection Better health. Lower costs. Better member experience.
