

Your 2015 Formulary

SignatureValue Four-Tier

effective January 1, 2015

Please read: This document contains information about commonly prescribed medications.

For additional information:

Call the toll-free member phone number on the back of your health plan ID card.

Visit **uhcwest.com** or **optumrx.com**[®]

- Locate a participating retail pharmacy by ZIP code.
- Look up possible lower-cost medication alternatives.
- Compare medication pricing and options.

Your Formulary

This Formulary outlines the most commonly prescribed medications for certain conditions and organizes them into coverage levels. An important part of the Formulary is giving you choices so you and your doctor can choose the best course of treatment for you.

Go to uhcwest.com for complete drug information

Since the Formulary may change, we encourage you to visit our website, uhcwest.com or optumrx.com[®]. This website is the best source for up-to-date information about the medications your pharmacy benefit covers, possible lower-cost options, and cost comparisons.

At UnitedHealthcare, we want to help you better understand your medication options.

Your pharmacy benefit offers flexibility and choice in determining the right medication for you. To help you get the most out of your pharmacy benefit, we've included some of the most commonly asked questions about the Formulary.

What is a Formulary?

This document is a list of commonly prescribed medications. Drugs are listed by common categories or class. It includes both brand and generic prescription medications approved by the U.S. Food and Drug Administration (FDA).

Please note: Where differences are noted between this Formulary and your benefit plan documents, the benefit plan documents will rule. It is not a complete list of medications, and not all medications listed may be covered under your plan. Please look at your benefit plan documents provided by your employer or health plan to see what medications are covered under your plan. You may also log on to **uhcwest.com** or **optumrx.com** or call the toll-free member phone number on the back of your health plan ID card for more information.

How do I use my Formulary List?

When choosing a medication, you and your doctor should consult the Formulary. It will help you and your doctor choose the most cost-effective prescription drugs. This guide tells you if a medication is generic or brand, and if special rules apply. Bring this list with you when you see your doctor. It is organized by common medical conditions. Medications are then listed alphabetically.

If your medication is not listed in this document, please visit **uhcwest.com** or **optumrx.com** or call the toll-free member phone number on the back of your health plan ID card.

What are Coverage Levels?

Coverage Levels are the different cost levels you pay for a medication. Each level is assigned a cost, which is determined by your employer or health plan. This is how much you will pay when you fill a prescription. Formulary Generic medications are your lowest-cost options. If your medication is placed in Formulary Brand or Non-Formulary levels, look to see if there is a Formulary Generic option available. Discuss these options with your doctor.

Check your benefit plan documents to find out your specific pharmacy plan costs.

\$	Coverage Level	Includes	Helpful Tips
	Formulary Generic Lowest Cost	Lower-cost drugs. Some low-cost brands are also included.	Use Formulary Generic drugs for the lowest out-of-pocket costs.
	Formulary Brand Mid-range Cost	Cost effective brand drugs.	Use Formulary Brand drugs, instead of Non-Formulary to help reduce your out-of-pocket costs.
	Non-Formulary Highest Cost	Mostly higher-cost brand as well as select generic drugs.	Many Non-Formulary drugs have lower-cost options in Formulary Generic or Brand levels. Ask your doctor if they could work for you.
	Specialty Non-Preferred	Higher-cost brand as well as select generic specialty drugs.	Many Specialty Non-Preferred drugs have lower-cost options. Ask your doctor if they could work for you.

Please note: Some plans may have two or four coverage levels, while others may not have any. If you have a high deductible plan, the coverage cost levels may apply once you hit your deductible. Refer to your enrollment and plan materials on uhcwest.com or optumrx.com, or call the toll-free number on the back of your health plan ID card for more information about your benefit plan.

When does the Formulary List change?

- Medications may move to a lower level at any time.
- Medications may move to a higher level when its generic becomes available.
- Medications may move to a higher level most often on January 1 or July 1.

When a medication changes levels, you may have to pay a different amount for that medication.

For the most up-to-date list, call customer service at the number on the back of your ID card.

Programs and Limits

Some medications are noted with letters next to them. The letters refer to our pharmacy benefit programs. Your benefit plan determines how these medications may be covered for you.

AE	Age Edit – This medication applies to a specific age group. Members outside of this age group need to meet specific criteria for approval.
E	E – Excluded from coverage for California and Oklahoma markets. Lower-cost options are available and covered.
FB	Formulary Brand
FG	Formulary Generic
GE	Gender Edit – This medication is covered only for specific gender based on FDA approved indications.
M	Medical – The medication may be covered under medical with Prior Authorization.
NF	Non-Formulary – A non-formulary drug.
PA	Prior Authorization required – Your doctor is required to provide additional information to UnitedHealthcare to determine coverage.
QL	Quantity Limit – Amount of medication covered per copayment or in a specific time period.
SNP	Specialty Non-Preferred – A specialty non-preferred drug.
ST	Step Therapy – Trial of a lower cost medication is required before a higher cost medication is covered.

To learn more about a pharmacy program or to find out if it applies to you, please visit uhcwest.com or optumrx.com or call the toll-free member phone number on the back of your health plan ID card.

Why are some medications excluded from coverage?

Medications may be excluded from coverage under your pharmacy benefit as defined by your Pharmacy Schedule of Benefits. There may be other medication options available.

Should I talk to my doctor about over-the-counter (OTC) medications?

An over-the-counter (OTC) medication may be the right treatment for some conditions. Talk to your doctor about available OTC options. Most OTC medications are not covered under your pharmacy benefit, but they may cost less than your out-of-pocket expense for prescription medications.

What is the difference between brand-name and generic medications?

Generic medications contain the same active ingredients (what makes the medication work) as brand-name medications, but they often cost less. Once the patent of a brand-name medication ends, the FDA can approve a generic version with the same active ingredients. These types of medications are known as generic medications. Sometimes, the same company that makes a brand-name medication also makes the generic version.

Is it a generic or brand name drug?

The drug list shows **brand name** drugs in **bold** type (for example, **Crestor**) and generic drugs in plain type (for example, simvastatin).

What if my doctor writes a brand-name prescription?

The next time your doctor gives you a prescription for a brand-name medication, ask if a generic equivalent or lower-cost option is available and if it might be right for you. Generic medications are usually your lowest-cost option, but not always. Visit **uhcwest.com** or **optumrx.com** to make sure.

How do I get updated information about my pharmacy benefit?

Since the Formulary may change during your plan year, we encourage you to visit **uhcwest.com** or **optumrx.com** or call the toll-free member phone number on the back of your health plan ID card for more current information.

Log on to **optumrx.com** for the following pharmacy information and tools:

- Pharmacy benefit and coverage information
- Possible lower-cost medication options
- A list of medications based on a specific medical condition
- Medication interactions and side effects
- Participating retail pharmacies by zip code
- Your prescription history

And, if Mail Service is included in your pharmacy benefit, you can also:

- Refill prescriptions
- Check the status of your order
- Set-up e-mail reminders for refills
- Manage your account

For more information

Call the toll-free member phone number on the back of your health plan ID card.

Or, visit **uhcwest.com** or **optumrx.com**

Where else can I go for information?

HealthCareLane.com includes short videos to help you learn more about UnitedHealthcare benefits and health insurance information.

“My Medications” worksheet

Take this worksheet with you each time you visit a doctor. Each of your doctors should be aware of every drug you take and you should have a list as well.

Name of Medicine and Strength	Coverage Level	I Take This Medicine For	Directions	Doctor
Example: Lisinopril, 20mg	Formulary Generic	High blood pressure	One tablet daily	Dr. Johnson

For more information

Call the toll-free member phone number on the back of your health plan ID card.

Or, visit uhcwest.com or optumrx.com

Where else can I go for information?

HealthCareLane.com includes short videos to help you learn more about UnitedHealthcare benefits and health insurance information.

UHCTV.com is a fun and easy way to learn about health terms and other health-related topics.

All branded medications are trademarks or registered trademarks of their respective owners.
