

Make preventive dental care a priority with Preventive MaxMultiplier

Preventive MaxMultiplier makes sure preventive dental care benefits are available to your employees all year long.

Here's how it works

Preventive MaxMultiplier covers preventive dental care without counting those claims toward the plan's annual maximum. This means exams, cleanings and other preventive and diagnostic care are covered, helping employees stretch their annual maximum dollars to use toward restorative care such as crowns or fillings.

What's covered?

- ✓ Exams
- ✓ Cleanings
- ✓ X-rays
- ✓ Fluoride treatments and sealants for children

The importance of preventive care

People with gum disease are at a

2–3x

greater risk of heart attack or stroke¹

Dental coverage that meets employees where they are

Getting regular preventive care is key to maintaining good oral health, which is also linked to better overall health. Preventive MaxMultiplier ensures preventive care is available to your employees—whenever, wherever.

1 Early in the year, Sarah needed a root canal but hadn't yet had her annual teeth cleaning. Normally, the cost of her root canal would go toward her annual maximum, with little to no money left over for other preventive care.

2 Because her employer added Preventive MaxMultiplier to her plan, Sarah had coverage for preventive care all year long. She got her root canal without worrying about eliminating her ability to get preventive care later in the year.

Here's an example of plans with a \$1,000 annual maximum, both with and without Preventive MaxMultiplier:

	Without ✕		With ✓
Annual maximum	\$1,000	Annual maximum	\$1,000
Cost of preventive care claims paid, deducted from annual maximum	– \$331 ²	Cost of preventive care claims paid; NOT deducted from annual maximum	\$331 ²
Amount remaining for rest of the year	\$669	Amount remaining for rest of the year	\$1,000

Connect your employees to dental care that matches their needs and moves their oral health—and overall health—forward
