

Important information about your prescription benefits

Effective January 1, 2016 for SignatureValue Formulary

Within the SignatureValue Formulary, medications are grouped by therapeutic class and then Formulary or Non-Formulary.

Medications moving to a higher coverage level

We evaluate medications based on their total value, including how a medication works and how much it costs. When several medications work in the same way, we may choose to move the higher-cost option to a higher coverage level.

| Therapeutic use | Medication name | Status | Alternatives |
|--|-----------------------|----------------|---|

| | Vivelle-dot | FB ▶ NF | |

Medications requiring an exception for coverage (applies to select SignatureValue California and Oklahoma markets only)

We evaluate medications based on their total value, including how a medication works and how much it costs. With exceptions, doctors are required to provide additional clinical information to verify that certain non-formulary medications are medically necessary. Exceptions apply to brand only, all dosage forms, unless otherwise noted.

| Therapeutic use | Medication name | Lower-cost options |
