

Updates to your prescription benefits

Effective July 1, 2016 for SignatureValue Formulary

Within the Formulary, medications are grouped by therapeutic class and then Formulary or Non-Formulary. This coverage level indicates the amount you pay when you fill a prescription. Please reference this chart as you review the following updates. Most options listed are available as Formulary Generic, your lowest cost option.

 <p>Formulary Generic Your lowest-cost medications</p>	 <p>Formulary Brand Your mid-range cost medications</p>	 <p>Non-Formulary Your highest-cost medications</p>
--	---	---

If your medication is listed below, you may continue taking it, but you may pay a higher cost. We encourage you to discuss the listed lower-cost option(s) that may also treat your condition with your doctor. Most options listed are available as Formulary Generic, your lowest-cost tier, and may have a clinical program in place.

Medications moving to a lower coverage level

The following medications are moving to a lower coverage level, making them more affordable.

Therapeutic Use	Medication Name	Coverage Level
Respiratory: Nasal Allergies	Dymista*	NF ► FB

*Does not apply to select CA and OK markets

Medications moving to a higher coverage level

Medications may move from a lower coverage level to a higher coverage level when they are more costly and have available lower-cost options.

Seizure Disorders	Lamictal ODT	FB ► NF	lamotrigine tablets (generic Lamictal)

Medications requiring an exception for coverage (applies to select CA and OK markets only)

We evaluate medications based on their total value, including how a medication works and how much it costs. When several medications work in the same way, doctors may be required to provide clinical information to verify that certain medications are medically necessary. The medications below will no longer be covered unless medically necessary.

Therapeutic Use	Medication Name	Lower-Cost Options
